

Transform Access to  
Children's Mental Health Care

## New Jersey Pediatric Psychiatry Collaborative Registry

Do you want to help children and adolescents access mental health services in NJ?

The NJPA is creating a registry of psychiatrists who treat children and adolescents. We invite you to [complete this survey](#) that will take no more than two minutes of your time. The information collected will be shared with the New Jersey Pediatric Psychiatry Collaborative (NJPPC) and will assist them with the identification of psychiatrists who are interested in receiving patient referrals.
